A WESTERN ROMANCE.

The Louisville Evening Nam pat isses the following romance of Western life :--

About ten years ago, a ista wart young Kentuckian, of robust figure and entropy mien, was passing through the streets of the little town of Montice o, in Wayne county, ant was essied by a fair maiden, who sat at the mindow of its most potentia, residence. The dero of this romantic episoce was un-

CEMENT FOR ANYTHING

A good cement for mending almost anything may be made by mixing together kharge and grycerine to the consistency of thick creams or resh putty. This cement is useful for mending stone jars or any coarse earthenware, stopoing least in seams of tin pans or was 1-201 ers, crac is and holes in iron kettles, etc. - ores an inen in ciame er in kettles can be he ec and the same used for years in soling water and feet. WHOLESALE NEWSPAPER SUB-SCRIPTION.

It will be remembered that last year the Stude la cer Bros. Wagon and Carriage Manu acturing Co. presented each of their army of work. men with a twe-ve-mont's subscription to a week y newspaper, the employe significing whichever paper he desired to take. Of course the aggregate expense of this token of good will to their workmen by the company was a large from citizens of their States seaving for an sum of money, but they propose to mour it amendment to the constitution probabiling the again, and as a preliminary step, have taken a vote of the force to see how many would prefer sex, is certainly a strong proof of the advance a turkey instead of the newspaper. Only three of the entire number expressed a choice, or the

turkey. The course of a manufacturing company that wi thus have a care for the intellectual wellbeing of its men, independent of their attitude each to the other as employer and employed, in a pecuniary point o' view, cannot se too strongly commenced. The so-called natural antagonism between capital and sapor will have hard work to assert itself when capital thus takes labor by the hand and says "Come up higher." The example or the Studebaker Bros. in this matter is worthy of imitation by manufacturers throughout the country.
